

# Giants by Anthem Worship

## VERSE 1

As we move from where we stand  
Into the promised land  
You've gone out ahead  
You're already making a way

We find hope in where we have come  
And have faith for what will be done  
You've gone out ahead  
You're already making a way

## Chorus

You go before us into the unknown  
Conquering giants wherever we go  
You've already gone  
Where no one would dare  
When we march into battle  
You're already there

## Verse 2

When the darkness is all we see  
And were held back by the enemy  
You've gone out ahead  
You're already making a way

When it seems like there's no way through  
And there's nothing left that we can do  
You've gone out ahead  
You're already making a way

## Bridge

Waters parting  
Mountains moving  
There's no stopping what you're doing  
You've made a way  
And we will follow you

Chains are breaking  
Walls are shaking  
Something different you're creating  
You've made a way  
And we will follow you
